

Softskill-Seminar **Research Integrity**

Trainer

Dr. Jo Havemann
Chief Consultant & Trainer at Access 2 Perspectives since 2012
PhD in Developmental Biology
Languages: German, English, Swedish

Julien Colomb
Trainer for Data Management and Open Science
Founder at Drososhare.net
PhD in Biology
Languages: French, German, English

Course Motivation

Research projects are often highly complex and time-consuming. This course will present and discuss a mix of classical and novel tools for project and time management. In order for research results to be shared and applied globally we will look at options and possibilities of Findable, Accessible, Interoperable, and Reusable (FAIR) data management.

Course Aims

- Be able to plan and structure a large research project
- Make Research FAIR again

Course Agenda

- Inputs for efficient time management
- Digital Tools for Science Project Management
- FAIR Data Management & Open Data
- Agile Kanban for Science
- Project Monitoring & Evaluation

Course Duration

1 day or 2 consecutive days (9am – 5pm)

We tailor all our softskill seminars towards your individual needs. The course modules are flexible and can be modified and combined with our other courses.
